## SWIND Windbreaker

Definition of outdoor areas with wider panoramas

Swind has a simple and functional wind breaker design concept that expands your terrace, patio or open-air spaces to shield outdoor living areas by offering adequate wind breaking with the option of total transparency.

System is mostly preferred at restaurants, cafes and terraces either private or commercial as an automatic vertical up-down glass separator for outdoor spaces, besides fixed panel can also incorporate the function of balustrade. Thanks to led stripe dimmer lighting integrated side frame the fixed panel assigns distinctive appeal.

The system is modular and completely flexible as there are no limits in the horizontal direction that can be used to surround spaces of all types and sizes. There are no vertical struts between moveable and fix panels that provides unobstructed view. The modules can be moved up-down individually or in groups by remote control and the position of movable panels can be adjusted according to desired height. The system can be fixed on the ground or can be portable with the wheeled base option, also a decorative harmony can be ensured with plant pot integration.
